

COLOURS FOR LIFE HIGH-GRADE CLAY PAINT

COLOURS FOR LIFE

The professional system

The COLOURS FOR LIFE version of the High-grade Clay paint is the multi-coloured companion to the creme-white classic clay paint. Your favourite colour can be selected among over 1000 harmonious shades.

The colour scale ranges from soft and gentle to strong and vivid shades. The positive features include the capability of regulating humidity and a high breathability. Moreover, the biogenic binder REPLEBIN® gives the coloured coatings excellent features.

The COLOURS FOR LIFE clay paint is available in trade sizes of 1.0 l, 2.5 l and 10.0 l with a coverage of approximately 9/ 23/ 90 m². For more information and all available colour tones see www.auro.de/en.

ECOLOGICAL COATINGS

High-grade Clay paint

The creme-white paint creates a cosy atmosphere. It can be used in any area of the house and blends in perfectly with all other colour shades. Please find more information on AURO High-grade Clay paint and also on our consistent choice of raw materials on www.auro.de/en.

COLOURS FOR LIFE High-grade Clay paint

An ecological lifestyle with colourful accents. A soft earth tone, a neutral grey, or a warm shade of red: colours can let your rooms appear bigger or smaller and they even have an influence on our mood. Colours can provide for a comfortable atmosphere, they can create a feeling of quiet and reassurance or stimulate creativity. Find more information and your favourite colour tone on www.auro.de/en.

HIGH-GRADE CLAY PAINT IN CREME-WHITE

Authentic building materials like clay paints belong to a sustainable lifestyle. They create a healthy indoor climate while their matt finish provides a very precious and beautiful appearance. The High-grade Clay paint in creme-white is the first ready-to-use clay paint on the market that gets along without any preservatives.

Suitable for allergy sufferers

Award: Following detailed examinations, the IUG (Institute for Environment and Health) confirmed that the product is suited for allergy sufferers. The feel-good paint is perfectly suited for all indoor wall surfaces. The use of AURO's biogenic binding agent REPLEBIN® makes sure that it is very low on emissions according to the strict AgBB evaluation scheme.

The creme-white paint is available in trade sizes of 1.0 l, 2.5 l and 10.0 l with a coverage of 9/ 23/ 90 m².

KEY FEATURES

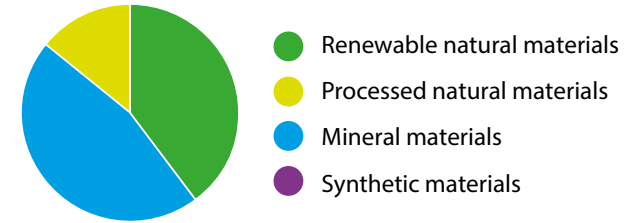

Clay paint underlines your personal style and provides ecological and aesthetic advantages. The High-grade Clay paint with its moisture-regulating and breathing characteristics is suited for all living areas.

The indoor paint helps to regulate the indoor climate and thus contributes to a sense of well-being at home. This is particularly good news for allergy sufferers. The clay paint is also perfectly suited for kitchens and bathrooms because the binding agent REPLEBIN® makes it very resistant against spray water.

The High-grade Clay paint can be applied by roller, brush, tassel or spraying equipment (airless).

ECOLOGICAL RAW MATERIALS

The raw materials we use are chosen in an environmentally compatible way. They come from mineral or organic sources and can after use be returned into the natural materials cycle. We do not use synthetic materials. On www.auro.de/en, you will find the origin of raw materials displayed for each product.

COMPREHENSIVE QUALITY

High-grade Clay paint – Quality features at a glance

- particularly moisture-regulating and breathing
- suited for all indoor wall surfaces
- ready-to-use clay paint
- the binding agent REPLEBIN® provides for excellent processing properties
- consistently ecological choice of raw materials
- moisture-proof and therefore suited for use in kitchens and bathrooms
- easy to redecorate, e.g. with all AURO wall paints
- overcoatable after 4-6 hours already
- due to the use of the biogenic binder REPLEBIN®, the product is very low on emissions according to the AgBB* evaluation scheme.
- free from any preservatives

*AgBB = Committee for Health-related Evaluation of Building Products. More information can be found on the website of the Federal Environmental Agency (UBA): <http://bit.ly/2nPbOXJ>
